Interview with the Czech Winner of the “25 Years TechniSat” Competition in June

TechniSat Digital GmbH was founded 25 years ago in the Eifel region of Germany and quickly grew into a multinational company. In 2012 TechniSat can look back on a quarter century of success, and is celebrating its anniversary this year with exciting promotions for dealers and consumers.

Until the end of the year, interested customers can access a competition on the TechniSat home page each month. Just complete a short registration form to take part! Everyone who answers a question correctly has a chance of winning an attractive prize each month - e.g. a TechniSat TV.

Mr. Popelka – from the Czech Republic - is the winner of the “25 Years TechniSat” competition in June.

TechniSat: Mr. Popelka, you're the winner of the competition "25 Years of TechniSat" in June. How did you hear about the competition?

L. Popelka: When I was looking for some information about new satellite receivers on www.technisat.cz, I have noticed the competition.

TechniSat: You mentioned that you are already a satisfied customer of TechniSat. You have two set-top-boxes from TechniSat – Digit MF4 and STR1. How did you hear about TechniSat?

L. Popelka: It was many years ago on the server www.parabola.cz.

TechniSat: Why have you chosen TechniSat products?

L. Popelka: Because of the quality from Germany.

TechniSat: What do you value most about the TechniSat products?

L. Popelka: Easy service, picture quality, perfect remote control.

TechniSat: TechniSat is celebrating this year its 25th anniversary. What would you wish for TechniSat?

L. Popelka: Lot of satisfied customers and many successful products.

About TechniSat Digital GmbH:

TechniSat Digital Group is a leading consumer electronics organisation with headquarters

in Daun, Germany. Specialising in premium DVB products, TechniSat designs, develops, and manufactures a range of digital receivers, PVRs, PC cards, CA Modules, and IDTVs with embedded Conditional Access and Common Interface for SD and HD services. TechniSat has production facilities in Germany and Europe as well as R&D in Germany and Poland. The products are designed and developed by TechniSat Digital's hardware and software engineering teams which have in-depth DVB expertise. Many CA vendors, such as Conax, Cryptoworks/Irdeto, Nagravision, Viaccess, NDS, and others, have licensed TechniSat Digital as a preferred business partner.

TechniSat Automotive has for more than 13 years been developing and producing high-quality products in the field of car infotainment, particularly car radios and radio navigation systems. This business division is certified in accordance with ISO/TS 16949 and supplies, among others, Volkswagen, Škoda, Seat, and other well-known automobile manufacturers.
